Tall Avenue

24th May 2022

Tall Avenue is a level track along the bottom of the scarp some distance away from houses. An ideal place to plant a varied high forest, in species groups so that you get the feel of walking through a forest of just that tree.

We have assumed that trees will be planted at 1.5 metre spacings, so ~ 200 to a space.

The main species near the track, the others in the background

The principal species are expected to be:
